

OFFERING PROFESSIONAL WEDDING VIDEOGRAPHY

IN EAST ANGLIA & LONDON

**FULL FILM - £1000 - £1200**

The full film is all of the main events of your day edited into one long 4K video, usually around 45 minutes - 1hr30m long. It would involve a multi-camera setup of at least three cameras to film your ceremony from start to finish, and can also include the speeches, cake cutting and dances as well. All audio is professionally recorded from lapel microphones and if possible, direct feeds from the sound system as well. This film has a quicker turnaround edit time of around 1-2 months, and the cost within that range depends on how many events of your day you would like me to film.

**CINEMATIC HIGHLIGHT FILM - £1700**

This is a shorter cinematic 4K film of your entire wedding day, usually between 5-8 minutes and edited to backing music. Coverage can be from the morning during bride & groom prep, capturing bespoke slow motion footage of the bridal party and groomsmen, along with drone shots over your venue. Then throughout the entire day from the ceremony, reception, speeches and ending with the dances. I usually get full coverage of all events as I would for the full film, so because of this I also offer you the raw unedited footage of all main events as part of this package.

This film tells more of a story of your wedding day, with audio lines from the ceremony & speeches edited into the video as well. The key feature of this film would be a designated time scheduled into your day to film some cinematic couples shots around the grounds of your wedding venue.

The editing of a cinematic highlight film involves a lot more coverage of footage, and the timespan of delivery is usually 2-3 months after your wedding day. As it involves more filming, I typically bring along a second videographer with me as well.

**EXTRAS**

360 Camera | Third Assistant Videographer | Trailer Reel | All Raw Footage

**FULL FILM + CINEMATIC HIGHLIGHT FILM - £2100**
